

## TECHNOLOGY FEATURE LIST

### Will my phone work?

Every day Qwikker supports more and more phones. We carefully verify all media types can be delivered from our Mobile Content Servers - on real phones - the phones real people use! These media-types include images, ringtones, wallpapers, and our customizable Java application. This approach guarantees that the content loaded up for your campaign simply works - no phone testing for you and no worries about compatible handsets.

If you don't see your phone on the list, it may be an older device or locked down by your carrier. We have found that most U.S. carriers are following the lead of their European and Asian counterparts and opening delivery up for Bluetooth!
